- EDI Transactions

CNC Turning & Milling Specialists

GEM Mfg, Inc. is a contract manufacturer specializing in low and mid volume CNC turned and milled components.

We are committed to providing our customers with products that exceed their quality and service expectations.

Continuous improvements within our organization are ensured through the use of the latest technologies available, LEAN & Six Sigma techniques, as well as the highest possible employee skill levels for the manufacture of our products.

This allows us to offer the lowest total cost solutions to our customers.
